### Aging And Human Longevity

Human Aging and Longevity Are Characterized by High Levels of Mitokines Mitochondrial stress elicits the production of stress response molecules indicated as mitokines, including fibroblast growth factor 21 (FGF21), growth differentiation factor 15 (GDF15), and humanin (HN).

### Human Aging and Longevity Are Characterized by High Levels ...

Dr. Christine Overall, a noted Canadian feminist philosopher, has written a compelling philosophical inquiry into aging, death and human longevity. At the end of her book by the same title, she concludes that other things being equal, a long human life is a better life and that social policies which promote the equal extension of human life to all populations are amply justified.

### Aging, Death, and Human Longevity: A Philosophical Inquiry ...

The big sea change of the past 10 to 15 years in aging research is that the scientific community is now near entirely behind the idea that aging is a viable target for therapy, and that we should be working towards greater healthy human longevity. Prior to this time, aging was near entirely a "look but don't touch" field, in which any talk of medical intervention in aging was strongly discouraged.
