Interlux Boat Painting Guide - jamestowndistributors.com

After the first coat has been applied, the surface will appear rough. This is a result of the exposed ends of grain absorbing the varnish and lifting. Sand smooth with a 220 grit sandpaper and apply a second coat thinned 10%-15%. Apply 2-3 thinned coats of varnish following label recommendations.

Boat Painting Guide & Color Card - Jamestown Distributors

Interlux uses four separate additives to combat UV energy: 1. Ultra-violet Absorber (UVA) As the energy from UV light enters the paint film, it is diffused back as infrared energy (IR). Those UV rays not reflected are dispersed evenly throughout the coating so that no singular attack on the film occurs. 2. Surface Stabilizer
