When adding transmission fluid to your Versa, be sure to add it slowly as it will fill up quickly and is difficult to remove excess fluid if you overfill. If you are having problems with the transmission in your Versa, such as clunky shifting or hesitation, check the fluid level first - it is amazing how many drivers pay thousands of dollars for transmission work when a half quart of transmission fluid would have fixed the problem.

I had a fender bender in it a year ago and the body shop replaced the trans cooler,they have records showing they replaced 1/2 of a quart of Nissan CVT fluid . Other than that only Nissan has done the maintance on the car and several times since the accident. I think the transmission might have burned the fluid to cause it to change colors.
