Nursing Care Plans & Documentation: Nursing Diagnoses and ...

A nursing care plan is a good communicating tool for patient care between nurses. Nurses assigned to the patient continuously update the plan as they carry out planned interventions in their respective shifts. It gives a quick glimpse on the intensity of care the patient needs. It serves as a guide in anticipating the patient's healthcare needs.

Such assessments and education are processes, therefore, the organization determines what, if any, documentation is required. Nursing Plans of Care: CMS has relaxed this requirement per the CMS 1135 waiver published March 30, 2020.

Documentation Challenges When Providing Care While ...

Nursing documentation, such as patient care documents, assessments of processes, and outcome measures across organizational settings, serve to monitor performance of health care practitioners' and the health care facility's compliance with standards governing the profession and provision of health care. Such documentation is used to determine what credentials will be granted to health care practitioners within the organization.
