Your laboratory report sample doesn't have to be perfect. All it takes is a little modifying and some easy rearranging to turn it into the ideal report. A lab report sample is essentially a beginning, middle, and end. The first thing you do with a laboratory report sample is choose where you 'd like it to go.

Lab reports are an essential part of all laboratory courses and usually a significant part of your grade. If your instructor gives you an outline for how to write a lab report, use that. Some instructors require a lab report to be included in a lab notebook , while others will request a separate report.

In the process of vector addition, each vector to be added is first resolved into components as shown in Figure 1. The components along each axis are then added algebraically to produce the net components of the resultant vector along each axis. This leads to the following: $R_x = A_x + B_x = A \cos \theta_1 +$
