- If the Key lock solenoid output is displayed as Lock, the next step in diagnosis should be to check the following PID (Figure 2 below).
- P SW is the park range switch, located in the AT shifter assembly. If the shifter is in the Park position and this PID remains OFF, suspect an issue with either the park range switch or the related wiring.

Solenoid - Troubleshooting Guide

Solenoid Strategy • Ford measures the flow rate for all of their solenoids used in the 6F30, 6F50, 6R80 and 6R140 applications.

- Transmission calibration software is then loaded, taking into consideration the individual solenoid flow characteristics and their position in the valve body.

Ford Solenoid Strategies

Engine speed must be above 500 rpm. Throttle angle (TPS) must be less than 3 degrees. Shift lever position must stay in PARK until prompted to shift to OVERDRIVE. Shift lever position must stay in OVERDRIVE after the Shift To Overdrive prompt until the scan tool indicates the procedure is complete.
