Microsoft believes everyone has the right to own their digital identity, one that securely and privately stores all personal data. This ID must seamlessly integrate into daily life and give complete control over data access and use. Today your identity includes more data than ever before, but you ...

Decentralized Identity - Own your digital identity

COLLECTING THE PAPER FOR RECYCLING Every year, waste management and recycling companies collect large amounts of material from these distributors. For the press distribution industry, paper recycling professionals work with the newspaper resellers who are also in charge of collecting the unsold papers, sorting them (to aid in the recycling process), and put them in the garbage skips.

The paper distribution - Paprec

As a highlight of this paper, we have designed and implemented our proposed solution as a fair job scheduler based on Apache Spark, a modern data processing framework. With extensive evaluations of our real-world implementation on Amazon EC2, we have shown convincing evidence that max-min fairness has been achieved using our new job scheduler.

Scheduling jobs across geo-distributed datacenters with ...

arises whether Oracle RAC or Oracle RAC One Node over a distance is a viable solution. Oracle RAC on Extended Distance (Stretched) Clusters is an architecture that provides extremely fast recovery from a site failure and allows for all nodes, in all sites, to actively process transactions as part of a single database cluster.
