VIPER RED DOT 8 9 Mounting the Viper In addition to the supplied low rail mount, an optional riser mount places the Viper red dot at correct height for AR-15 rifles. Mounting Options 6 7 The Viper red dot is shipped from the factory with a low rail mount that clamps to both a Weaver or Picatinny rail. Note: If your firearm is not already equipped

Viper - Vortex Optics

Viper riflescopes are available with either a 30 mm or 1-inch tube so select the ring size that matches the tube diameter of your riflescope. Be sure to select a base and matching rings appropriate for your rifle and mount according to the manufacturer's instructions. Note: Vortex Optics recommends not exceeding 18 in/lbs (inch/pounds)

The Vortex Riflescopes

The Vortex Viper PST riflescope is pre-set from the factory with the reticle in the center of the adjustment ranges. If you have changed the settings and wish to approximately reset the reticle to the center, this can be done easily: 1. Turn the windage or elevation dial as far as possible in either direction. Do not force

the dial.

Elevation Adjustment Knob - Vortex Optics

Vortex Optics believes strongly in responsible, ethical hunting and a word should be said about long range shooting at game. Although reticles like the Vortex ® Dead-Hold BDC can make long distance shots much easier, there are still many other variables, such as wind, affecting every shot. It is important for hunters shooting at long
